EXECUTIVE SUMMARY

Technical product leader with 10+ years of experience, including 8+ years building Google Cloud observability and data platforms for AI observability. Connects telemetry ingestion, query performance, and cost visibility to customer and business outcomes. Led platform initiatives adopted by 20+ product teams, reduced logging latency by 70%, and helped unblock \$100M+ in enterprise sales pipeline. Partners with engineering, FinOps, and executives to turn complex platform problems into product strategy and delivery.

CORE COMPETENCIES & DOMAIN EXPERTISE

Observability Data Platforms: Telemetry Ingestion & Query Pipelines, Unified Observability Analytics Data Platform(Logs, Metrics, Traces) for AI Observability and Agentic Capabilities

Telemetry Economics & FinOps: Platform Unit Economics, Cost-to-Serve Modeling, Granular Telemetry Cost Attribution

AI-Ready Observability: Agentic Observability, AI Telemetry Workflows, Automated Diagnostic Workflows

WORK HISTORY

Google Cloud

Senior Product Manager

2018.02 - 2026.09

- **Observability Data Platform Strategy:** Led multi-year strategy for Cloud Observability Analytics, unifying log, metric, and trace analysis for AI observability and autonomous cloud strategy. Helped unblock \$100M+ in enterprise cloud sales pipeline.
- **Cost visibility & customer value:** Partnered with staff engineers, infrastructure leads, and FinOps on telemetry cost visibility and routing. Co-authored GKE granular cost insights architecture combining Cloud Monitoring with BigQuery billing data to help enterprise customers understand usage and identify cost-saving opportunities.
- **Query performance:** Identified an 8x latency gap between user queries and backend APIs by tracing logging bottlenecks across intake, indexing, and query paths. Aligned multiple engineering teams on improvements that reduced latency in the zero-state logging experience by 70%.
- **Shared platform adoption:** Launched the Universal Dashboard Framework as sole PM, replacing disparate monitoring charts with a reusable GCP-wide standard. Reached 20+ product teams in 12 months, reduced enterprise support tickets by 50% in the first month, and lowered cross-team maintenance overhead.
- **Platform modernization:** Led the migration of legacy Stackdriver console and telemetry capabilities into Pantheon, the core GCP Console. Coordinated cross-team architectural dependencies and VP-level stakeholders, retired legacy infrastructure, and increased enterprise active-user adoption by 20%.
- **Open-source ecosystem:** Expanded observability integrations with Grafana to support enterprise telemetry workflows across hybrid and multicloud environments.
- **Delivery & developer productivity:** Shipped 10+ core infrastructure features in one year. Standardized APIs and reusable components, improving adjacent development teams' velocity by 30% over two years.

Scotiabank	Product Manager	2017.02 - 2018.02
• Infrastructure Bottleneck Diagnosis & Unit Resiliency: Diagnosed core architectural and data pipeline bottlenecks capable of triggering 5x service latency spikes during traffic bursts; partnered with systems engineering to refactor API ingestion flows. • Platform Vision & Digital Modernization: Defined multi-year strategic vision and API roadmap for the regional Banking-as-a-Service (BaaS) platform, orchestrating migration of mission-critical banking services across web and mobile channels in Latin America.		
NCFG(Fintech Startup)	Head of Product	2016.04 - 2017.02
• 0-to-1 Financial Data Ecosystem: Owned entire product lifecycle from ideation to launch in 5 months, designing high-throughput transaction and risk ledgers, 2 consumer apps, and merchant management portals handling high-volume real-time transactions. • Scale & Commercial Execution: Partnered with executive leadership to design GTM and viral growth loops, acquiring 200,000+ active transacting users within 90 days.		
eBay Inc.	Product Manager	2012.10 - 2016.04
• Data-Driven Discovery & Traffic Scaling: Delivered 20%+ YoY organic traffic growth for 3 consecutive years by re-architecting search indexing, faceted discovery infrastructure, and conversion funnels through rigorous A/B experimentation.		
Rogers Communications	Product Manager	2010.05 - 2012.10
• Search Engine Architecture & NLP Ingestion: Fine-tuned Endeca NLP and indexing pipelines for Canada's largest telecom portal; improved search accuracy by 30% and expanded search keyword coverage by 50%.		

HONORS, KEYNOTES & TECHNICAL THOUGHT LEADERSHIP

- **Google Cloud Tech Impact Award (2023):** Awarded as sole PM for conceptualizing, launching, and scaling the Universal Dashboard Framework across 20+ GCP product teams.
- **Google Feats of Engineering Award (2020):** Awarded for exceptional execution of the Monitoring-in-Pantheon migration and legacy infrastructure decommissioning.
- **Industry Keynote Speaker:** Featured speaker at Google Cloud Next ("[How MLB Creates Granular Insight with Observability Analytics](#)", 400+ attendees, 4.7/5 rating) and [GrafanaCon](#) (2019) on enterprise observability data strategies.
- **Author & Thought Leader:** Authored [15+](#) official Google Cloud technical whitepapers and blogs on [SQL alerting](#), [Log Analytics query architecture](#), [GKE cost visibility](#), and [context-aware observability](#).

EDUCATION

MBA — Rotman School of Management, University of Toronto

Bachelor of Science — Computer Science, Fudan University
