EXECUTIVE SUMMARY

Data-driven Senior Product Manager (8+ years) with a strong Computer Science background and deep expertise in **scaling high-throughput platform infrastructure, developer frameworks, and complex app architecture**. Proven track record of leading core platform systems, optimizing latency and reliability metrics at scale, and driving developer velocity across multi-disciplinary engineering teams. Skilled in leveraging AI/LLM automation and data analytics to transform complex technical challenges into intuitive UI frameworks, robust developer tooling, and high-impact user experiences.

CORE COMPETENCIES

Platform & Framework Architecture: Client Frameworks, UI Systems, Developer Tooling & Experience (DX), System Logging & Telemetry

App Performance & Reliability: Latency Optimization (Startup & Query Latency), UI API Latency Discrepancy, Crash Rate Reduction, Edge-Case Handling

Data-Driven Execution: Advanced SQL, High-Throughput Analytics, A/B Testing, Top-line Metric Optimization

AI & Agentic Workflows: LLM Integration, Autocloud infrastructure and AI Observability

WORK HISTORY

Google Cloud	Product Manager/Senior Product Manager	2018.02 - Present
--------------	--	-------------------

- **Core Platform Standardization & DX (Tech Impact Award):** Conceptualized and scaled the Universal Dashboard Framework (UDF) from 0 to 20+ core product teams in 12 months, defining standardized UI/API systems for partner engineering teams to integrate into. Cut support overhead by 50% in month 1.
- **System Performance & Latency Optimization:** Architected end-to-end logging, telemetry, and query workflows for platform infrastructure. Uncovered a critical 8x query-to-API performance bottleneck and partnered with core engineering to deliver a **70% latency reduction**, drastically improving platform reliability, off-nominal error handling, and system responsiveness.
- **AI-Driven & Agentic Platform Evolution:** Spearheaded the product vision to transform infrastructure analytics into an AI-ready platform. Integrated automated LLM/SQL engines enabling users and system agents to process complex analytical queries via natural language, accelerating feature adoption and establishing automated platform workflows.
- **Large-Scale Platform Migration (Feats of Engineering Award):** Directed the end-to-end migration of legacy infrastructure into the Google Cloud Console (Pantheon). Established unified, highly available platform architectures while driving a **20% increase in active user adoption**.
- **Cross-Functional Velocity & Execution:** Partnered closely with UX Design, UX Research, and 60+ distributed engineering and data science team members to ship 10+ core platform infrastructure capabilities in 1 year, boosting execution velocity by 30%.

- **Strategic Partner Alignment:** Unblocked **\$XXXM+** in sales pipeline by building targeted telemetry and analytics solutions and managing alignment across Product, Sales, and Technical Operations.

Scotiabank **Product Manager** **2017.02 - 2018.02**

- **Banking-as-a-Service (BaaS) Strategy:** Diagnosed key enterprise infrastructure bottlenecks capable of causing 5x service latency spikes; defined long-term strategic vision and API roadmap for the regional BaaS platform.
- **Digital Modernization:** Managed feature roadmap and user experience for web and mobile banking platforms in Chile, accelerating customer migration to digital-first services.

Net Credit Group (NCF) – Fintech Startup **Head of Product** **2016.04 - 2017.02**

- **0-to-1 Ecosystem Launch:** Defined company-wide product vision and delivered an end-to-end financial ecosystem in 5 months (2 mobile applications, ledger system, partner management portals).
- **Growth & GTM Execution:** Partnered with executive marketing and sales leadership to execute go-to-market strategies, acquiring 200,000+ active users within 90 days.

eBay Inc. **Product Manager - SEO** **2012.10-2016.04**

- **High-Throughput Search Infrastructure:** Delivered 20%+ YoY organic traffic growth for 3 consecutive years by architecting multi-channel search infrastructure, running continuous A/B testing, and optimizing routing & conversion funnels.

Rogers Communications **Product Manager - Search** **2010.05-2012.10**

- **Search & Indexing Pipeline Optimization:** Enhanced search accuracy by 30% and broadened system coverage by 50% on Canada's largest telecom portal by fine-tuning Endeca search indexing, data pipelines, and hardware/software query workflows.

Google Inc. **Senior Account Manager** **2005.12-2008.11**

- **Direct AdWords Campaign & Account Management:** Partnered directly with advertisers to build, optimize, and scale Google AdWords campaigns across high-value verticals (Travel, Finance, B2B), achieving 40%+ YoY revenue growth for 3 consecutive years.
- **Operations & Team Leadership:** Founded and led a 30-person tele-sales ops team and a 20-person client acquisition team, building cross-department incubators that set regional acquisition benchmarks (5x increase in new client acquisition in Year 1).

EDUCATION & RECENT PROJECT EXPERIMENTS

MBA	Rotman School of Management	University of Toronto
B.S	Computer Science	Fudan University

Side Project: Designed and built interactive learning website for youth financial literacy (invest-in-future.onrender.com)

PUBLICATIONS & TALKS

15+ Official Google Cloud Technical Publications on [Query Telemetry with SQL for AI Observability](#), [GCP Observability](#) and [GCP Cost Insights](#).

Public Speaker: Google Cloud Next 2024 ([How MLB Creates Granular Insight with Observability Analytics](#), 400+ attendees, 4.7/5 rating), [GrafanaCon](#) (2019).
